

# WarnerMedia™

## Google Authenticator Registration for Embershot

July 2020

# Google Authenticator Registration Instructions for Embershot

## Purpose

Enable two-factor authentication for Embershot as part of Warner Bros.' continued efforts to protect data and secure personal information.

This user guide will teach you how to:

- Register existing Embershot account with Google Authenticator and set up two-factor authentication on mobile device or web browser.
- Change password to comply with WarnerMedia requirements.

## Device Requirements

Apple devices operating on iOS 10.x, Android Devices running Android 8 or greater.

## You will need...

- Your mobile device (iPhone, iPad, Android). For best results, ensure your device is fully charged.
- Download the Google Authenticator app.

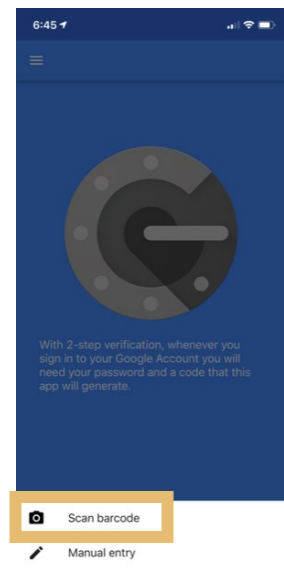

Please contact  **WB Productions Support** [support@wbprod.com](mailto:support@wbprod.com) if you have issues during registration or accessing corporate resources.

## Instructions

### Register Embershot with Google Authenticator

**Note: If not using a mobile device, see instructions in section E below to install Authenticator browser plug-in.**

- 1. Login to Embershot, note one-time authentication entry screen:**
- 2. Click link for your smartphone** from the Apple App Store or Google Play to install Google Authenticator (if not already installed on your mobile device)
- 3. Launch Google Authenticator** mobile app. Click the "+" sign and select "Scan barcode."

## Register Embershot with Google Authenticator - Continued

**4. Scan Bar code** displayed (from Step 2.)

**Embershot**

You have access to Warner Media content and Warner Media requires Multifactor Authentication. Please download Google Authenticator, scan the QR code and enter the subsequent code to continue. Please contact WB Production Technology Support if you have questions or issues - wbproudtchcomm@wbprod.com
